O! Devi Saraswati, the most Auspicious Goddess of Knowledge with Lotus-like Eyes, An Embodiment of Knowledge with Large Eyes, Kindly Bless me with Knowledge. I Bow to you.

OUR VISION AND VOICE OF BHAGAVAD GITA

The Bhavan's K.N.Rao Institute of Astrology at Bharatiya Vidya Bhavan, New Delhi, is dedicated to imparting the timeless wisdom of the Vedas while instilling the highest standards of discipline. Our esteemed faculty, who meet global standards of excellence, work tirelessly to make our students not only technologically advanced but also ethically grounded, thereby enhancing the overall quality of life for humanity,

We uphold the classical tradition of astrology and strictly adhere to the principles outlined in **Brihat Parashara Hora Shastra**, a foundational text in Vedic astrology. We do not endorse or promote contemporary practices such as Grah Shanti, gemstone prescriptions, or Kaal Sarpa Dosha remedies, which are often circulated through various media channels. Instead, our approach focuses on authentic, time-honoured astrological wisdom, ensuring a holistic and grounded understanding of life's cosmic principles.

Existence is an intricate web of interdependence, where every entity is connected to another. A change in one inevitably influences the other. This profound truth is beautifully expressed by Lord Krishna in the Bhagavad Gita, where He says that the realized soul, united with the Self, "sees the Self in all beings and all beings in the Self" (6.29), and "sees Me everywhere and everything in Me" (6.30).

These verses reveal an eternal truth — that a part of us exists in every being, and a part of every being exists within us. This understanding reflects the harmony and interdependence that bind all forms of life and creation.

Even in our daily lives, this interconnectedness is evident. We exist because of our parents; our children exist because of us. We gain knowledge and wisdom through our teachers. We are nourished by the farmers who cultivate the land and benefit from the

Bharatiya Vidya
Bhavan

discoveries of scientists who lived long before us. Every comfort, every aspect of our lives, is the result of countless unseen contributions — a beautiful chain of connection that sustains existence itself.

Astrology is a science that reflects this very interdependence. It reveals how the positions and movements of celestial bodies influence the patterns of our lives. When mastered, it provides profound insights into our destiny and the cycles of time that shape our experiences.

Yet astrology is not merely a study of the stars — it is also a study of time itself. In the Bhagavad Gita, Lord Krishna declares, “I am Time (Kaal)”, the eternal force that governs creation, preservation, and dissolution. To truly understand this divine principle, one must approach it with both Bhakti (devotion) and Shraddha (faith).

Thus, astrology, while deeply scientific, is also a spiritual pursuit. It calls for inner purity, reverence, and surrender — for only through devotion and faith can one grasp the deeper cosmic harmony that unites the self, the universe, and the Divine.

ASTROLOGY - A DIVINE SCIENCE

The ancient sages made profound observations about the influence of planets on life on Earth. According to these timeless insights, our past karma plays a pivotal role in shaping our destiny in this life. Moreover, the actions and decisions we make in the present also influence the course of our future, creating a continuous cycle of karmic cause and effect. Nature itself unveils our destiny to those who possess the discernment to understand it, particularly through the positions of the planets and the celestial configurations at the time of birth.

Yet, many people remain unaware of their past karma, leading to the age-old question: Why is one person born rich and powerful, while another is born poor and oppressed? According to ancient wisdom, human beings are reborn time and again to experience the fruits of their past actions (karma) until they achieve **Salvation** or **Moksha**. The accumulated karma from previous lifetimes is mirrored in the circumstances of one's birth, shaping the individual's life journey.

Astrology, however, is not simply an art of fortune-telling, as commonly perceived. Rather, it is a valuable science and a guiding tool that helps individuals navigate both prosperous and challenging times. Astrology is one of the six Vedangas of the Vedas, providing a framework for understanding past and future events by analyzing the

Bharatiya Vidya
Bhavan

position of the **Lagna** (ascendant) and planets at the time of birth or at the time of a query. The field of astrology is divided into three main skandh:

- **Siddhanta:** The astronomical principles underlying astrology.
- **Samhita:** The study of world events and their astrological connections.
- **Hora:** The examination of individual horoscopes and the lives of living beings.

Despite a prolonged period of colonial rule that hindered the growth of our indigenous knowledge, astrology has continued to flourish. Today, astrology remains a vital science, embraced by a significant portion of humanity, offering solace, guidance, and wisdom during times of difficulty and uncertainty.

BHAVAN'S K.N. RAO INSTITUTE OF ASTROLOGY, NEW DELHI

Bharatiya Vidya Bhavan's **K.N. Rao Institute of Astrology**, a premier global centre for the study of astrology, is ideally situated at Kasturba Gandhi Marg in the heart of New Delhi. The astrology programme was established in 1987 by **Shri K.N. Rao**, Indian Audit and Accounts Service (Retd.), a renowned modern-day astrologer, within the hallowed halls of Bharatiya Vidya Bhavan.

The Institute offers rigorous academic courses, including **Jyotish Alankar** and **Jyotish Acharya**, with the aim of nurturing deep knowledge and encouraging advanced research in the field of astrology. Our curriculum is designed to equip students with both theoretical understanding and practical expertise, empowering them to contribute meaningfully to the discipline.

Upon successful completion of the **Jyotish Acharya** course, exceptional students are selected for specialized research programs, where they work under the guidance of eminent faculty members. Such research is published in the **BVB Journal of Astrology** and other recognized platforms, highlighting the significant contributions made by our scholars to the growth and advancement of classical astrology.

Through its commitment to excellence, the Institute continues to play a pivotal role in preserving and evolving the ancient science of astrology for future generations.
